Admixture to concrete mix, U.S.A. patent #5,728,208

KALMATRON® KF-A

& its liquid version K100®

added to concrete or to mortar, transforms conventional batch into waterproofed High Performance Concrete.

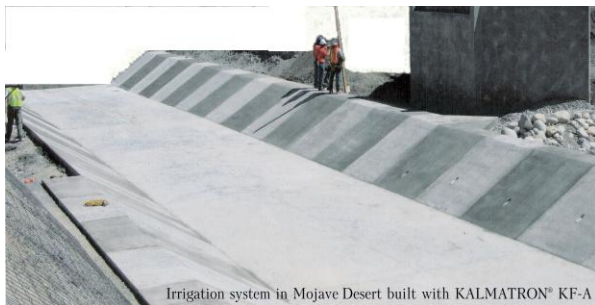

No other admixture results in:

- No** curing required
- No** shrinkage cracks ever
- No** efflorescence appearing
- No** dilatation cuts of regular slabs
- No** edges curling even for thin slabs
- No** filled up precast & one step stucco
- No** liquid penetration from both sides
- No** isolating or shielding decay coats.

Yes, this is new concrete economy:

Twice shorter concrete construction time

The cost of third part of every square foot is your saving.

Irrigation system in Mojave desert built with KF-A by LA D&WP
without isolation and curing. No cracks and no sun-heat defects.

Polar Bear Shores in the cooled
Marine pool of Sydney's ZOO
